Figure 1. Schematic representation of the experimental design. The first part of the experiment consisted of a familiarization phase, followed by a training phase and a testing phase. The training phase was divided into two parts: a pre-training phase and a training phase. The testing phase was divided into two parts: a pre-testing phase and a testing phase.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.
